

15 October 1957

Wally,

Suggestions for managing the business while I'm gone:

25X1

1. Check out security matters with [redacted]

25X1

2. If any new missions are run, check out instructions for ordering duplicate materials from Eastman (which [redacted] accomplishes) with Art Lundahl. Generally, in a case of a penetration mission, you would follow the existing ordering procedure.

3. Justification papers of the recent past are in a folder with this memorandum.

4. I don't anticipate any requirements problems, but they may arise with regard to the Near East, in which case you should transmit to the Project Director the recommendation of the ARC, whatever that is.

5. It's Art Lundahl's practice to check here when he has a request for a high level briefing on AQUATONE photography. Since I am never too sure of Mr. Bissell's reaction, I normally inform him that a request has come in to Art and ask him if he has any objection. This, of course, can be done through Doris if you like.

25X1

6. Also attached is Mr. Bissell's approval of reinstituting distributing [redacted] However, I haven't distributed this to HTAUTOMAT who will take action since I am waiting until Mr. Bissell has had an opportunity to check with the Director. Pursue this with Doris or Mr. Bissell as necessary.

James Q. Reber
